

BEDBUGS

PROBIOTIC BEDDING ADDITIVE FOR POULTRY

Active Ingredients:

Bacillus bacteria
Moisture scavengers
Acidifiers

Concentration:

2 Billion cfu/g

Packaging:

200g sachets
2.5kg, 5kg and 25kg

Storage and Handling:

Dry and cool
Keep container closed
tightly when not in use

Shelf Life:

2 years

BEDBUGS powder is a probiotic additive for use in a coop application to help reduce bacteria and odour. It provides a combination of probiotics, moisture scavengers to keep bedding dry, and organic acids to neutralise odour and support the reduction of harmful bacteria and fungi.

APPLICATIONS

- Poultry houses.
- Chicken coops.
- All types of poultry species and ostriches.

FEATURES

- Helps reduce pathogenic bacteria (Salmonella), pathogenic fungi, mould and insect outbreaks in and around the coop.
- Reduction in Ammonia.
- Accelerates the degradation of organic waste, which results in a reduction of odour.
- Keeps bedding dry, assists with keeping feet, eggs and underside clean.
- Ideal for enhancing composting.

DOSING

- Scatter around roosting, laying and damp areas.
- Use weekly or as needed.
- 200g treats 10m².
- For large poultry house applications BEDBUGS can be mixed with bedding before adding to the houses.

INGREDIENTS

- Consortium of 5 beneficial bacillus bacteria species and strains.
- Moisture scavengers.
- Acidifiers.
