

BEDBUGS

PROBIOTIC BEDDING ADDITIVE FOR LIVESTOCK AND POULTRY

BEDBUGS powder is a probiotic additive for use in livestock and poultry bedding to help reduce pathogenic bacteria and odour. It provides a combination of probiotics to neutralise odour and support the reduction of harmful bacteria and fungi.

APPLICATIONS

- Stables and stalls.
- Sleeping areas.
- Dairies.
- All livestock species.
- Poultry houses, all species of poultry and ostriches.

FEATURES

- Helps reduce pathogenic bacteria, pathogenic fungi, mould and insect outbreaks in and around the stalls.
- Reduction in Ammonia.
- Accelerates the degradation of organic waste, which results in a reduction of odour.
- Ideal for enhancing composting.

DOSING

- Dilute 1L of concentrate in 10L of water.
- Add to backpack sprayer or similar.
- Lightly spray over the bedding twice weekly.
- 10L of dilutes product will treat 100m².
